

REMITTANCE ADVICES FOR REPLACEMENT WARRANTS ORIGINATING FROM AN ADPICS VOUCHER OR DIRECT VOUCHER

Remittance advices for **replacement** warrants, originating from an ADPICS voucher or direct voucher, did not contain the applicable notepad information. This means these replacement warrants were issued with blank remittance advices.

A change was made last night (07-24-96) to print the notepad on replacement warrant remittance advices. Please note, however, that the current document number (V6 xxxxxx or W6 xxxxxx) will not be on the remittance advice attached to the replacement warrant.

In addition, if the ADPICS document has multiple suffixes or a RTI split, the remittance advice will contain a separate line item for each suffix/split.

These are the only two differences between the original warrant's remittance advice and the replacement warrant's remittance advice. We are working on fixing the software problem which is causing these differences.
